THE USE OF MODERN INNOVATIVE TECHNOLOGIES IN TEACHING ENGLISH

Annotation: This article covers the great importance given to foreign languages in the Republic of Uzbekistan, as well as the innovative technologies necessary for their study.

Keywords: Foreign language, gaming, innovative technology, technological tools, methods, techniques.

After the independence of our country, the interest in teaching foreign languages has increased and many opportunities have been created for young people. As the first president of our country Islam Karimov said, "at the moment, great importance is attached to teaching foreign languages in our country. It is also not surprising, of course. Today, there is no need to assess the importance of perfect knowledge of foreign languages for our countries, for which the world community is trying to occupy a worthy place, for our people who are building their great future in cooperation and cooperation with our foreign partners." As a logical continuation of these ideas, the Presidential Decree "on measures to further improve the system of teaching" foreign languages" adopted on December 10, 2012 has introduced opportunities to learn foreign languages. New methods and requirements have been developed in accordance with the recommendations of general European frameworks (CEFR) for the teaching of a foreign language, assessment of the knowledge and skills of Foreign Language teachers in our republic. According to him, textbooks were created for students of secondary schools and vocational colleges. In accordance with these requirements, the study rooms were equipped with stands and new information and communication techniques. The demand for foreign language learning is also increasing day by day. The science of foreign language is divided into four aspects (reading, listening, understanding and speaking), giving individual insights and skills on each of them. Educational technology, this is the productive use of modern Information Technology in the educational process. It also envisages improving the quality and effectiveness of education

by bringing modern innovative technologies into the educational process. In particular, there are several advantages of using such information and communication technologies in the study of a foreign language. The role of modern technology in language learning and teaching cannot be overemphasized. The use of technological tools comes hand in hand at every aspect of foreign language learning (reading, writing, listening, understanding and speaking).

For example, to understand by listening, of course it is impossible to perform this process without a computer, player, CD disc. Listening comprehension is one of the most important parts of language learning. In this, the reader is asked at once to pay attention to the pronunciation of the speaker, the observance of the rules of writing, the richness of the word and its meanings. In the educational process, the use of modern technology is an important factor that students also have a good knowledge of and use of information and Communication Technology. Teaching and learning a foreign language using modern technologies is one of the most effective ways.

In this process, including:

- when using computers, the reader can also hear foreign language video Films, shows, dialogues, also see movies or cartoons;
- it is possible to listen and watch foreign language radio broadcasts and television programs;
- the use of tape recorders and cassettes, which are considered a much more traditional method;
- CD players can be used. The use of these technical tools makes the process of students learning a foreign language more intense and effective

ensures that there will be [1]. Today, it is becoming a tradition in schools to pass lessons through interactive games. It is known that the passage of the lesson on the basis of various games will allow students to demonstrate their abilities, concentrate attention, improve their knowledge and skills and become stronger. The basis of the use of gaming technology is the activity that protects and accelerates the reader. Psychologists note that the psyche of the game activity relies on the fundamental needs of the individual to manifest himself, to find a stable place in life, to manage himself, to realize his opportunities. In any game floor should lie the generally accepted principles of training, tactics. Educational subjects should be taken as the basis for the educational game. In the process of games, the reader is more interested in this exercise than in a simple lesson and is engaged in leisurely activities. It should be noted that the game is the most avallo, a way of teaching. Students are interested in Playing Lessons, strive to win, the teacher through them also gives education to the student. The reader is interested, believes that I can write, can listen and understand, can speak and play a game in English

[2]. As we know, in the current educational process, the reader must be a subject. Bunda focusing on more interactive techniques will increase the effectiveness of Education. One of the most important requirements for English language classes is to provide students with independent it is to teach thinking. Today, teachers of English are using the following innovative techniques, relying on the experience of Teachers of the United States, England:

- "Solution to the problematic situation" (Creative Problem Solving) hukmiga students who find out how the beginning of the story to apply this method will be read, the students will be referred to.
- "Merry Riddles" (Merry Riddles) teaching puzzles to students is important in teaching English, they learn words that are unfamiliar to them, and they find the answer to thinking riddles;

— "Quick response "(Quick answers) will help in improving the effectiveness of the mentioned lesson;

— Use of different games in the classroom to interest students in the lesson [3];

In conclusion, as a result of the use of innovative methods in English language lessons, students' logical thinking skills develop, their speech becomes Fluent, a rapid and correct answer qualification is formed. Such methods arouse enthusiasm for knowledge in the reader. The reader seeks to see a thorough presence in the lessons. This makes students become active subjects of the educational process. As the education system sets itself the task of educating a free-thinking, competent, mature person, in the future we can add our own with the help of which we will develop more perfect ways for future teachers to effectively use innovative technologies.
